

# YPF Global Network

Our global network initiative has been created to facilitate a breeze amidst Bangladeshi international students. This program will encourage extensive research and collaboration of the members, helping them strengthen the understanding of different policy issues. Our program aims that the members will enhance their fundamental concepts of their preferred policy areas, meanwhile exchanging their knowledge and research findings with others. This will bring Bangladeshi policy enthusiasts under the same banner to unlock new possibilities going forward.

## How to be a part of our Global Networks

Any YPF member who is a Bangladeshi international student can join the YPF Global Network by filling up a form that has been shared in our Facebook group and on the website. They can also express their interest to someone from the core team of YPF, who will cooperate with them.

## How our Global Networks will function

- Working together with the respective coordinators of the network, the members will produce write-up, infographics, videos and other relevant contents to demonstrate their understanding of globally important topics. These will be published in the page and forum, and the best ones on our official website.
- Webinars will be held on current policy issues as a collaboration of their efforts.
- Global Network will uphold the works of YPF to the global arena which are initiated and undertaken in Bangladesh.
- Global network will support collaboration with international events where YPF is an official partner.

## How will you benefit from being part of our policy networks?

### *For students*

- Networking opportunity with several like-minded students and professionals.
- Member produced content will be shared in the YPF group and from the YPF page with due credit of the contributors. The content will thus be available to a wide

audience, including scholars and experts who are involved with YPF and are members of our Facebook group.

- Contributors of the selected best content will soon get a chance to talk about their work on short video, which will be available to a large audience, including experts.
- The best of the produced content will be chosen to be published on our website.
- Members will be able to share and promote the content they produced on social media sites such as LinkedIn and Facebook.
- Members will have access to exclusive webinars arranged by the policy network.
- Based on their contribution, members may be promoted as research associates and core team members for YPF.
- Access to the unique platform that brings all Bangladeshi international students together.
- Students studying courses related to policy making or having an interest to work with organizations that deal with these in the future can gain experience by being a part of this team. This will also serve as a value adding section on their CV when they will apply to these organizations.
- Members will be eligible for subsidized participation in YPF affiliated events.

### *For Professionals*

- Contributors of the selected best contents will soon get a chance to talk about their work on short videos and webinars which will be available to a large audience including experts.
- Knowing the current thoughts of youth and regular interaction with them to stay updated about the young generation's ideas regarding their respective networks.
- Networking opportunities with several other professionals both in and outside their own fields.
- Respected professionals of our networks can promote their own projects/work within the network.
- Opportunity to showcase one's research findings, work or experience via webinars, articles, infographics, videos and other contents.
- Members will be able to share and promote the content they produced on social media sites such as LinkedIn and Facebook.
- Members will be eligible for subsidized participation in YPF affiliated events.
- The members' organization can collaborate with the network for relevant projects if possible.
- Based on their contribution, members may be promoted as research associates and core team members for YPF.
